

World class milk foaming technology

The **Black&White3 CTMC** offers world class milk foaming technology, combining impressive product versatility, ease-of-use, high volume output, and quality components. All the benefits of the CTM with the added wonder of Chocolate.

Modular Design

Maintenance can be carried out quickly and cost-effectively. All modules are instantly exchangeable, a unique concept for coffee machines

Steam Module & 'Cool Touch' Steam Wand

High capacity 4ltr boiler for continuous, unlimited steam and hot water supply. The 'Cool Touch' steam wand offers barista quality milk delivery, safely.

Reliability

Durable aluminium grinder with ceramic burrs

Strong Stuff

Solid stainless steel brewing unit and stainless steel front.

Touch-tech

Customisable 7" LED colour touch screen with clear menu display.

Energy Saving

With 'Energy save' technology you reduce operating costs while conserving resources and preserving the environment.

Easy Cleaning

Automatic cleaning system with step-by-step instructions for a simple and consistent approach to maintenance.

Machine Specifications

Water

This machine requires a 15mm cold water feed with isolated stop valve, 3/4 inch- BSP screw fittings used (standard for washing machines). 1-3 BAR pressure is needed to run the machine. Very high/low pressure will need to be addressed prior to install with a pump fitted for low pressure and a regulator fitted for high pressure.

Waste

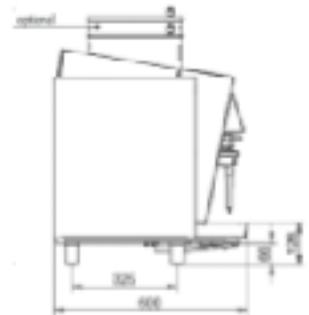

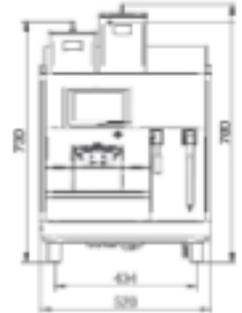

This machine requires 1½ inch down pipe.

Power

This machine requires access to either a 32amp Single Phase or Three Phase - 16amps per phase power supply. This can be hardwired or a bayonet plug can be provided. Please confirm at time of order

Filter

This machine will require a minimum of a BRITA C 300 water filter (provided at time of install). Please make sure there is sufficient room for the filter next to the water supply
