

Swiss Made Masterpiece in a Compact Format

The **Black&White4c** combines Swiss-made precision, comprehensive functionality and incredible milk quality in an industry-leading compact footprint. The 4c kick starts a fourth generation of the trusted, premium coffee machines from Thermoplan.

Brewing Chamber

An industry recognised reputation for creating delicious, consistent espresso every time.

Milk System

40 years of experience in milk foam research and development delivered the patented Wendel System. Adjustable foaming settings and a new temperature monitor prepares 'barista level', consistent, stable, textured milk - to combine with the perfect espresso.

Cleaning System

Automatic cleaning system with an efficient, HACCP approved, 25 minutes cleaning cycle. Timed programme cleaning cycles and regular hygienic rinse triggers, ensure coffee quality.

Unique Modularity

The original module system. All modules are instantly exchangeable, allowing for quick and efficient removal, servicing and replacement. This critical feature minimises downtime and inconvenience for operators.

Under Counter Refrigeration

Utilising large capacity under counter refrigeration this model saves considerable space on counter, reducing the 4c to a slim 298mm without compromising drink quality

Compact Format

An industry leading 298mm width that enables operators to deliver more with their on-counter space.

Screen/Software

7" touch display with capacitive touch technology, x30 drink options, and 3mm thick reinforced glass that is both scuff and scratch resistant. Intuitive use programming with a customisable interface and four different user groups with degrees of authorisation:

1. Self-service
2. Barista
3. Manager
4. Technician

Energy Saving

13% energy consumption saving against previous models

Machine Specifications

Water

This machine requires a 15mm cold water feed with isolated stop valve, 3/4 inch-BSP screw fittings used (standard for washing machines). 2-4 BAR pressure is needed to run the machine. Very high/low pressure will need to be addressed prior to install

Waste

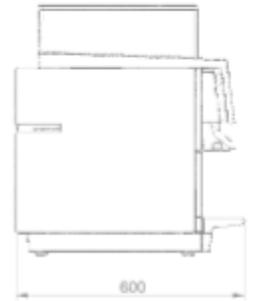

This machine requires 1½ inch down pipe.

Power

This machine requires access to 2 x 15amp plug sockets on site

Filter

This machine will require a minimum of a BRITA C 300 water filter (provided at time of install). Please make sure there is sufficient room for the filter next to the water supply
